

# BBA-Mini

The BBA-Mini is the smallest aluminum enclosure that we carry. Pole or wall mountable (mounting hardware not included), the BBA-Mini can hold a single Group 22NF lead acid battery. The 9.75" x 4" backplate can fit a smaller charge controller along with breakers and terminal blocks. Two knockouts on the back and two on the bottom give installation flexibility. The screw cover is lockable as well.
