

Modular Mounting Pole System

The modular mounting pole system is comprised of three main parts:

1. Bottom Section – Designed to be buried in the ground 18” with an 80lb bag of Sakrete.
2. Middle Section – bolts together the bottom and top sections.
3. Top Section – designed with steel mounting plates with hardware to mount brackets.

Once installed, the modular pole’s resultant camera height is 12ft from grade.

The galvanized pipes are 2 3/8” diameter and are designed to withstand hurricane force wind speeds.

Installation instructions can be found in the “User Guide” under the modular pole section.
